A BRIEF INTRODUCTION OF THE FIRM:

Photochemical Enterprise FOTON in Bydgoszcz (town of 500.000 inhabitants, northern part of Poland) represents photochemical industry being engaged in meeting the social demands in this field in home market and abroad.

The firm was established many years ago, and acquired a huge technological knowledge and a high market position all over the world.

The technology is based upon FOTON's own patents and some foreign licences.

The firm has its own engineering staff and skilled workers.

There are lots of possibilities of its growth because of the fact FOTON has universal stock of machine tools enabling applying the photo-technology, typographic technology, metal and wood machining and others.

Besides the photochemical production FOTON supplies the photo-services all over the country.

Some of specifications and photos enclosed in this booklet will clarify you everything.

Have a look at them!

GENERAL DIRECTOR

★ RECORDING PAPERS

- cardiograph purposes
- termoscript
- dynascript (indicating)
- tachoscript
- for typography and graphic artists

★ GRAPHICAL FILMS

- Graphical films FOTON

- WP lining, directly positive, orthochromatic
- BGF-LC for photocomposition, panchromatic
- BGS-F and BGS-5 for lining works, orthochromatic
- BGO-5 and BGO-5 Mat high lining film, orthochromatic
- BGO-8 and BGO-8 Mat extra high lining film, with screen appliance type LITH

- Paper

- PGF for photocomposition
- PGF-LC for photocomposition with a paper base of PE (polyethylene)

We offer you the photochemical materials as follows:

★ PHOTOGRAFICAL PAPERS

FOTONBROM – for developing

FOTONCHLOROBROM – for universal usage

FOTONCHLOR – for contact prints

FOTONPANCORBROM – for black-white enlargements using coloured negatives

Paper gradation

- soft
- medium
- normal
- hard
- high-hard

Base paper

- blue-white

Paper

- white

- glittering

- half mat

- mat

Surface structure

- smooth

- fine – grained

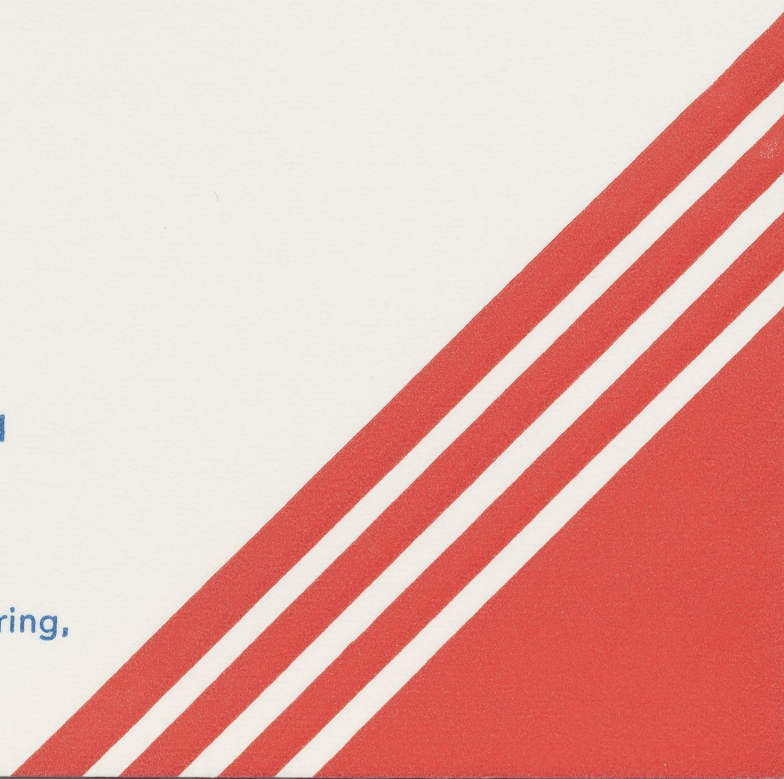

- silky

Thickness

- thin

- carton

FOTONKOLOR – for colour materials developing, normal, glittering, smooth and carton.

We also supply you

★ PHOTOCHEMICAL SERVICES

- black – white film developing
 - negatives
- colour negative film developing
 - ORWO color process
 - C-41 process
- colour positive film developing
 - ORWO chrom process
- black – white prints and enlargements
- colour prints and enlargements
 - with FOTONKOLOR materials
 - with materials of EKTAPRINT process
- slides setting

DEVELOPERS

- negative black – white
 - fine – grained (W-17, Hydrofen)
 - fine – grained equalizers (W-37)
- universal usage
 - W-1 for positive papers and films
 - W-19 (Unifen) for negative papers and films
 - W-41 (liquid) for negative papers and films
- positive
 - W-14 (Fenal) for positive papers and films
- typographic
 - W-8, – W-34, – W-35, – W-36, – W-38,
- X-ray radiographic
 - W-16

COLOUR DEVELOPER SETS

- FOTNOKOLOR 5013, 5015, 5016
- positive sets and negative sets ZN-3 (equivalent of C-41)

FIXERS

- universal U-1
- X-ray radiographic U-5
- typographic U-8
- typo-radiographic U-9 (rapid process)
- radio-typographic U-12

OTHERS

- FOTONAL, FARMER reducer, intensifier WZ-1
